

REMARKS

The portion of the specification relating to the prior art has been amended to clarify an ambiguity which applicant's attorney noticed upon a further study of the application. The amendment does not constitute new matter since it is supported by the application as originally filed.

Attached hereto is a marked-up version of the changes made to the claims by the current amendment. The attached page is captioned "**Version with markings to show changes made**".

Please charge any additional fees in connection with this petition to our deposit account No. 06-2425.

Respectfully submitted,

FULWIDER PATTON LEE & UTECHT, LLP

VERSION WITH MARKINGS TO SHOW CHANGES MADE

A manual rotation of a “round” hair brush has certain significant disadvantages. It is time consuming. Furthermore, the hair brush has been removed from the user’s hair after each rotation of the hair brush through approximately one-half ($\frac{1}{2}$) of a revolution. The next one-half ($\frac{1}{2}$) of a revolution of the hair brush has not then been at the position of the previous one-half ($\frac{1}{2}$) of a revolution of the hair brush. This has prevented the user’s hair from being as tidy or lustrous, until the issuance of patent 6,098,635 as the user would have otherwise preferred. Patent 6,098,635 issued on August 8, 2000 to Claudio Marino for a Motorized Rotating Hair Brush. The assignee of record of this application has an exclusive license under patent 6,098,635.
